

Connect Facebook

Manage and publish to your own Facebook Page. You need a Facebook Page and a Meta app with the Pages permissions.

Prepare

- 1 Make sure you are an admin of the Facebook Page you want to connect.

Create a Meta app & get the App ID / App Secret

- 1 Go to <https://developers.facebook.com/> → My Apps → Create App → 'Business'.
- 2 Add the 'Facebook Login' product and, under Settings → Basic, copy the App ID and App Secret.
- 3 Add the OAuth redirect URI: your Redirect Base URL + /oauth/facebook/callback.
- 4 Request the pages_manage_posts and pages_read_engagement permissions (App Review for production).

Connect in Social_Platform

- 1 Paste the Facebook App ID and App Secret into the Facebook row of the Setup panel.
- 2 Click Connect and choose the Page to manage.
- 3 The status turns to 'Connected'.

Note: keep your App Secret / API Secret private — never share it publicly.
